

Excel Error when exporting data from CLS software

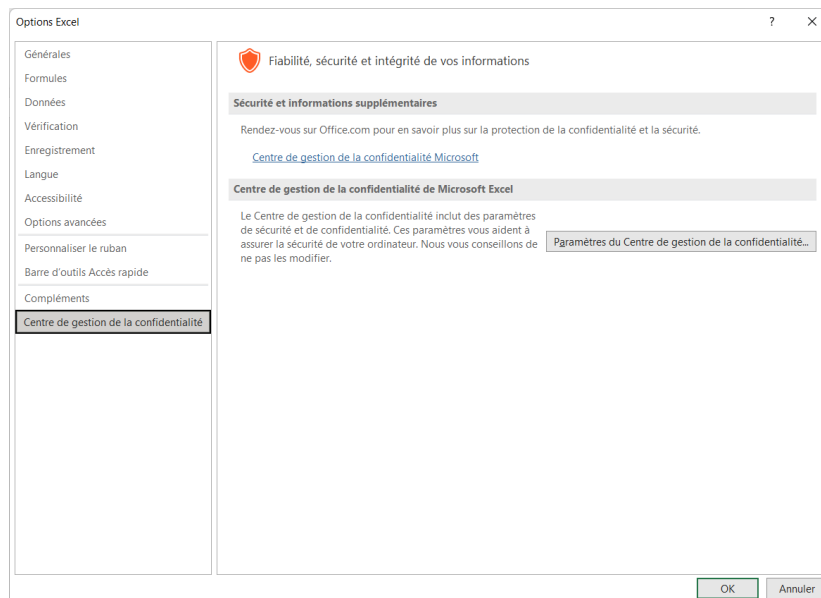

Before performing an Excel export it is important to activate the option « Trusted access to the VBA project object model »

Procedure :

Open Excel and select « **Option** »

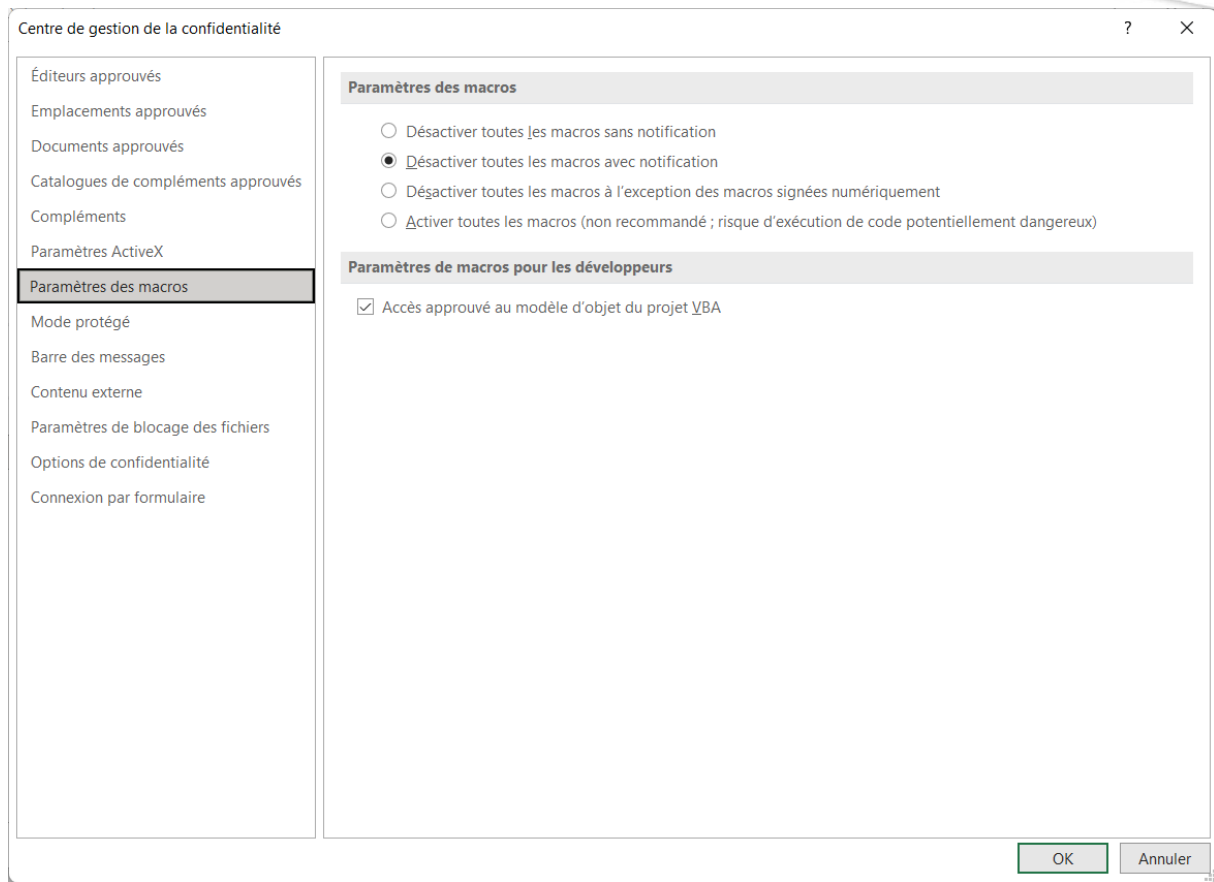

The following window appears :

Go to the « **Privacy Center** » et sélectionner « **Privacy Center Setting** ».

The Privacy Center is displayed.

Check "**Trusted access to VBA project object model**" in the "**Macro Settings**" menu.

Click OK to save the change.
